Application Areas

Areas of Use

Apart from the food industry, it is used in cosmetics, rubber and plastic industries, precision machinery and tools, and the textile industry. It is used as a lubricant in polyurethane sponge bed factories.

It is used as a mold release agent in the plastic industry, to protect molds in stock. It is used to lubricate and protect medical tools and devices, precision tools.

Usage

It can be used with dipping, spraying, wiping methods. Shake before use.

Storage

Do not store below 2 °C (35.6 °F) and above 40 °C (104 °F). It is flammable! Take precautions against fire during storage and use. Keep tightly closed in its original packaging. In cold weather, fluidity may decrease and the product may separate, it does not affect performance, shake after waiting at room temperature.

Shelf life is 4 years from the date of production.

Packaging

20 liters

Product code: TC 83027
