

## HIGH PRESSURE MACHINE

# ST200 KT

Pump Litres	15L/min-900L/H
Maximum Pressure	200BAR/2900PSI
Pump Model	R1520
Pump Heid Material	Brass
Regulator	With
Autoswitch	Yes
Motor Power	5.5 KW 380V/50HZ
Motor Speed	1450RPM
Hose / Length	10M
Filter	With
Foam Canon	None
Gun / Lance	Gun with trigger 85cm lance
Nozzle Tips	0.40
Net Weight	75 Kg
Product Size	700*450*960mm
Box Size	805*480*705mm

The pump filter protects the pump motor and other internal components from damage caused by dirt, sand, or other foreign particles. This helps the pump last longer and reduces the

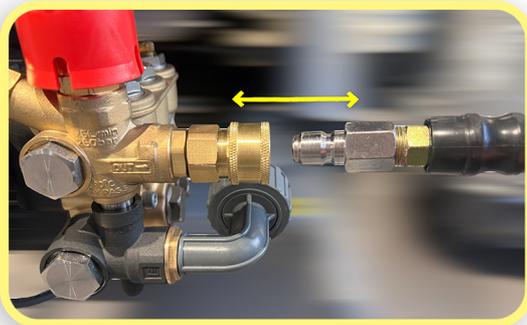

Facilitating easy assembly enhances user experience, ensuring the secure and efficient transmission of high-pressure water through accurate connections.

The bidirectional rotating nozzle in high-pressure machines makes cleaning processes more effective and user-friendly.

In high-pressure washing machines, the water filter prevents dirty particles from the water source, ensuring a cleaner water flow to the pump and nozzles without causing damage.

This design feature speeds up the processes and provides ease of use.

The hose being 10 meters long offers both convenience and durability, providing users with ample reach for various cleaning tasks while ensuring robustness in its construction.
